Lynn,

We believe that the \$14,300 bond that was submitted for Oakley Mountain Corp would be sufficient for the level of work that they have proposed to do for now.

We intend to issue a ROW for them to operate within the limits of the existing 1 acre unreclaimed quarry at Green Peak only. No work is to be done outside of this existing quarry. We are also going to permit them to jointly use the existing milling and processing area currently permitted to Bill Bown and the access road into the area. The is a total of 3.05 acres. They may also undertake further reclamation on the main quarry on top of the hill, but are not permitted to mine stone.

Assuming these limitations, we believe the United States would be adequately covered with the \$14,300 bond.
